

## Titan Internet Testimonial

Essential Travel Ltd

Titan Internet have provided us with everything from domains names and virtual servers to full co-located dedicated servers, switches and firewalls over the last ten years. They also provided us with full reseller support when we ran an IT support company prior to our current business.

In my entire experience of working with Titan, I have always found them to be expert, reliable, enthusiastic and flexible. They manage all of this while also being extremely fast and good value for money, I just can't recommend them highly enough.

Over the last ten years they have repeatedly helped us through many technology challenges and time after time have always been at the end of the phone whenever we needed them. I simply wouldn't want to work with anyone else.

After my experiences and after contacting a large number of hosting companies I'd recommend Titan Internet if you're serious about ecommerce, online technology and web hosting.

Richard Hannan. Director, Essential Travel Ltd.
