Firebrand Training

Firebrand Training is a global provider of Accelerated Learning. We use Titan Internet to host our entire catalogue of websites (which includes domains across Europe, Middle East and Asia) as well as our email.

Communication with our customers is essential, and Titan Internet is helping us move towards our goal of becoming a £100m business.

Although Firebrand is headquartered in the UK, we have offices and training centres around the world. It is imperative that we are always available to our global customers, and seamlessly operating whatever the time zone.

Thanks to Titan Internet's 100% uptime, we rarely need assistance. However, when support is required, it is handled quickly, politely and professionally. Not only does Titan offer fantastic value for money, but our high expectations are continually exceeded.

As someone who has worked with and compared many large hosting organisations, I recommend Titan Internet to anyone requiring a hosting solution. If not for the quality of the product and value for money, it's for the customer support.
