

[Skyscanner – Flight Search](#)

Skyscanner is a website that offers a powerful and flexible way of finding the cheapest flights. We provide instant comparison on flight prices for over 670,000 routes on over 600 airlines, as well as price comparison for car hire, hotels and holidays.

We moved to Titan in 2004 through a word-of-mouth recommendation after a series of frustrations with other providers. From that time onwards we have received excellent service that has scaled as fast as we have, and yet remained responsive and personal.

We use Titan to host our entire portfolio of Skyscanner domains, which now range from Spanish ([Skyscanner.es](#)) to Swedish ([Skyscanner.se](#)), Russian ([Skyscanner.ru](#)) to Romanian ([ro.Skyscanner.com](#)), not to mention Japanese ([Skyscanner.jp](#)), German ([Skyscanner.de](#)) and Korean ([Skyscanner.kr](#)).

It's vital that Skyscanner is always available for our users, 24 hours a day, 365 days a year and Titan allows us to serve our 10 million worldwide users per month in a slick and professional manner.

With the number of Skyscanner users growing every week, I'm pleased to say that hosting has not been an area where we have experienced any growing pains!
